POST CONFERENCE TOUR

Curonian Spit

Sands right in the middle of Europe? Unbelievable, but true! Over five thousand years ago the waves and winds of the Baltic Sea drifted dunes and eventually shaped the Curonian Spit – a stripe of land which separates the Curonian Lagoon from the Baltic Sea. The unique Neringa resort located on the Curonian Spit stretches for even 50 kilometres connecting the settlements of Juodkrantė, Preila, Pervalka and Nida.

Wandering dunes. Nida dunes leave all visitors astounded. Standing on the peak of dunes you'll enjoy a breathtaking view: hills of white sand and waves of the Baltic, the verdure of pine-trees and calm Curonian Lagoon. You get the feeling of listening to the symphony of wind, sand and water performed by nature. Peace and snow-white beaches. Neringa enchants with tranquillity. Professional yachtsmen and lovers of yachting, power kites and paragliding like to recreate here. Strolling along the seacoast, holidaymakers can find Lithuanian gold – amber rinsed ashore by the waves of the Baltic. By the way, Nida boasts the highest number of sunny days among all Lithuanian locations.

Delicious fish. When in Nida you must taste the fish! The exclusive dish in this area is smoked fish: eel, bream, mackerel, pike-perch, herring and catfish. Fish is smoked according to special tradition passed on from generation to generation. Just wait and find out yourself – it's more than delicious!

In 2000, the Curonian Spit was included into the UNESCO List of World Natural Heritage as one of Europe's most beautiful and unique landscapes.
